Exclusive
Pro Series
Refrigeration
from ASKO

For those who expect more

We have been selling high quality appliances to demanding customers for more than 60 years. This has given us all the experience we need to create a whole new range of appliances for the kitchen that will move our design philosophy and quality thinking a step forward. The name of the range is ASKO Pro Series™, a hallmark of high quality and thoughtful design in every detail.

203 cm fridge freezer

RWF2826FI
203 cm wine chiller

A statement in the kitchen
With a loading capacity of over 400 litres each and a weight of nearly half a ton, they are anything but standard. Add smart features like dual refrigeration system, flexible loading racks, height adjustable shelving and convertible cooling drawer and you get one of the best designed and most flexible fridge freezers on the market.

Perfect temperature for storing

Have you ever experienced that your favourite wine does not taste as good as you remember it? An important factor for maintaining and developing the wine's flavours is temperature. With an ASKO Pro Series™ wine cooler you can set exactly the right temperature for the type and character of wine you want to preserve, allowing two separate temperature zones, for red and white wine.

Handled with care

ASKO's wine fridge is not just storage for your wine bottles, but in fact a small wine care system. In addition to the perfect temperature, it also provides gentle storage on extendable beechwood racks, which run smoothly and seamlessly on telescopic rails, and has a soft close function. Storing wine bottles on wood instead of, say, steel means that the wine does not cool too quickly and the bottles will not be damaged. The bottom rack, or display rack, can be angled upwards, allowing you to show off your treasures to their best advantage. The display rack can also be safely used for already opened bottles.

Straight up or on the rocks?

Simply connect your fridge to your water supply and the smart electronic ice maker will ensure that your ice stock never runs out. Good for hot days and late nights.

Convertible drawer

The drawer has a separate temperature control enabling you to choose either wine, freezer or fresh-food mode. This is a perfect function when you temporarily have to store more food for a dinner party or when you need extra space for storing large food. The conversion from either the freezer mode to fresh-food mode and vice versa takes just about three hours.

Flexible compartments

The lower cooling drawer is equipped with a movable divider that can be placed in five different positions. Above this is a sliding tray that you can easily push aside when you need to access the food at the bottom of the drawer.

Extra durable hinges

The hinges on the ASKO Pro Series™ XXL fridge/freezer and wine cooler are extra sturdy and designed to withstand heavy loads and frequent use over many years. Furthermore, the XXL fridge/freezers are also equipped with a pressure equaliser that makes the doors easy to open and close.

See inside

You won't miss anything in our fridge and wine cooler. We have fitted them with no less than eight efficient LED lights at different levels for maximum illumination of all parts of each compartment. The lights in the wine cooler include various adjustments, which allow you to dim the light when you close the door, or stay on even when the door is closed.

Always the right temperature

The touch control with LCD is smartly designed and easy to use. It is easy to set the exact temperature in the different zones and the advanced central control unit ensures that the temperature is kept at exactly the same level all the time. The flat surface is also easy to keep clean.

Dual refrigeration systems

Fresh foods are best preserved in a humid yet chilly environment, while frozen foods require dry, frigid air to prevent decay and freezer burn. With the ASKO Pro Series™ each refrigerator and freezer area has its own closed system with a compressor and an evaporator, preserving fresh and frozen foods in the best possible way.

Long live the vegetables!

With the Freshbox™ your fruit and vegetables are kept fresh for longer and also retain vitamins and nutrients longer. You do not have to worry about buying too much fruit and vegetables that you may not consume at once - you simply keep them in the Freshbox™ until you need them.

Preserve for longer

Fast and even distribution of cool air is crucial to preserving your fresh food. The ActiveAir™ function allows you to store your food on any shelf and ensures that the temperature is rapidly restored after opening and closing the door. The continuous air flow also reduces drying out and preserves up to 60% of the food's first-day freshness.

Easy to see

Having a big fridge doesn't always mean you need to store more food, but allows you to organise the food better and find the ingredients inside.

RF2826FI

Product group: Fridge/freezer
 Colour: Stainless steel
 Height: 203 cm

General description

- Installation type: Built-in
- Type of display: Touch

Performance

- Volume (net): 445L

Energy consumption

- Energy consumption (kWh/year): 400

Features

- Freshbox™ - fruit and vegetables
- ActiveAir™ - optimized air flow
- Convertible - turn freezer into fridge
- Electronic icemaker
- Fridge/freezer drawer

RWF2826FI

Product group: Fridge/freezer/wine cooler
 Colour: Stainless steel
 Height: 203 cm

General description

- Installation type: Built-in
- Type of display: Touch

Performance

- Volume (net): 445L
- 106 bottle capacity in wine fridge

Energy consumption

- Energy consumption (kWh/year): 400

Features

- Convertible - turn freezer into fridge
- Wine cooler compartment
- Electronic icemaker
- Two temp. zones for wine cooler
- Fridge/freezer drawer

DPRF2826S
Decor panel for fridge/freezer

DPRWF2826S
Decor panel for wine cooler

SBS2826S
Side-by-side kit

Accessories

You can choose to design your own front door panel in wood or any other material, or mount the specially designed steel doors with Pro handles on your Pro Series™ fridge/freezer and wine cooler. You can also enhance the fit and finish with the side-by-side kit, which eliminates the gap between the two.
