

REVOLUTIONARY ASKO DRYING CABINET SPOTTED ON THE BLOCK

Unique drying solution proves perfect for apartment living

ASKO's unique drying cabinet was featured in one of the stunning laundries recently revealed on Channel Nine's *The Block Glasshouse*, highlighting its place as the ultimate laundry assistant in stylish and space-limited Australian homes.

The clever way to dry

Drying cabinets provide an environment similar to hanging garments out on the washing line on a warm, windy day. But ASKO's drying cabinet eliminates the need to expose laundry to the harsh elements of the Australian climate and with no moving parts, it means there's less wear to your garments.

Feature packed and deceptively spacious

At 170cm tall, the drying cabinet accommodates large and hard-to-dry items like rain-drenched footwear and manchester. Deceptively spacious, it can store and dry the equivalent of a 16-metre clothing line, making it perfect for apartment living (like *The Block's* Darren and Dee). Complete with shoe rack, door hanger, pull out racks and glove hanger, the ASKO drying cabinet offers a gentle dry for the most delicate of items while significantly reducing creasing.
